Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Howerton on 12/5/06.

The application has been amended as follows:

In the **Claims**:

Claim 1 (Currently Amended) A plant infected with a modified plant virus, said modified plant virus comprising modified plant viral nucleic acid and expressed plant viral coat protein, said modified plant viral nucleic acid comprising a nucleotide sequence coding for a foreign peptide from an animal virus inserted into said plant viral nucleic acid in a region that codes for an exposed part of an expressed native portion of the plant viral coat protein, said inserted nucleotide sequence being an addition to the existing native functional plant viral nucleic acid, said foreign peptide being greater than five amino acids in length ~~and up to approximately twenty amino acids in length~~, wherein said plant contains assembled modified plant virus resulting from the assembly of said modified plant virus, wherein said modified plant virus is a modified comovirus.

Cancel Claim 7.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Applicant has amended (on 6/7/02) the Continuing Data on the first page of the instant Specification to claim priority for foreign application 91 08386.5 (Great Britain, filed 4/16/91). However, applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in the body of which the present application should be identified by application number and filing date.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Guzo, Ph.D., whose telephone number is (571) 272-0767. The examiner can normally be reached on Monday-Thursday from 8:00 AM to 5:30 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Irem Yucel, Ph.D., can be reached on (571) 272-0781. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
